ABHISHEK KUMAR

Aspiring Software Engineer | Frontend Developer | AI/ML Enthusiast

Bengaluru, Karnataka, India | +91-7870538336 | abhishekkumaramba89@gmail.com | linkedin.com/in/abhishekkumar-b67742380

PROFESSIONAL SUMMARY

First-year B.Tech Computer Science student at JAIN University with a strong foundation in Python, JavaScript, and frontend web development. Passionate about AI/ML and software engineering, with hands-on experience through certifications in AWS, Microsoft Copilot, Machine Learning, and the Nestlé Nesternship Programme. Actively developing Data Structures & Algorithms skills through a dedicated 60-day daily practice challenge on GeeksforGeeks (Day 27/60). Seeking an internship opportunity at a product-based company to contribute to real-world engineering projects and grow as a developer.

EDUCATION

JAIN (Deemed-to-be University) — Bengaluru, Karnataka

Bachelor of Technology in Computer Science Engineering | *September 2025 – September 2029*

- 1st Semester SGPA: 7.5
- Relevant Coursework: Data Structures & Algorithms (In Progress), Programming Fundamentals, Web Development
- Actively solving DSA problems on GeeksforGeeks — 27/60 days streak (60-Day Challenge)

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, HTML, CSS
- **Frontend Development:** HTML5, CSS3, JavaScript (DOM manipulation, ES6+), Responsive Design, CSS Flexbox & Grid
- **AI/ML Concepts:** Introduction to Machine Learning, Prompt Engineering, AI-Powered Applications
- **Cloud Platforms:** AWS (Amazon Web Services — Solutions Architecture Fundamentals)
- **Security Knowledge:** Application-based threats protection, Device-based security controls
- **Tools & Platforms:** Git, GitHub, VS Code, Microsoft Copilot
- **Currently Learning:** Data Structures & Algorithms (GeeksforGeeks 60-Day Challenge — Day 27/60), Machine Learning Implementation

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- AWS Solutions Architecture Job Simulation — Cloud architecture and scalable infrastructure design
- Microsoft Copilot AI Suite — AI productivity tools, prebuilt agents, and prompt engineering
- Machine Learning Fundamentals — Core ML algorithms and applications
- Cybersecurity — Application and device-based threat protection and security controls
- Nestlé E-learning 2026 | Resilience — Nesternship Programme (Nestlé Needs YOUth) — Resilience, adaptability, and personal effectiveness in professional environments

DSA PRACTICE & CODING ACTIVITY

- **GeeksforGeeks 60-Day DSA Challenge (Day 27/60 — Ongoing):** Solving one algorithmic problem daily, covering arrays, strings, linked lists, recursion, and sorting algorithms
- Topics covered so far: Linear & Binary Search, Bubble/Selection/Insertion Sort, Stack, Queue, Recursion basics, Two-pointer technique
- Focused on building problem-solving patterns relevant to product-based company coding interviews

PROJECTS & PRACTICAL EXPERIENCE

Frontend Web Development

- Building responsive web pages and small apps using HTML5, CSS3, and JavaScript, focusing on user-friendly interfaces and modern design principles
- Practicing DOM manipulation, event handling, and interactive UI components through self-directed projects
- Note: Currently developing a personal portfolio website — planned to be completed before any offline interview rounds

Machine Learning Exploration

- Exploring ML fundamentals and experimenting with basic models using Python (NumPy, Pandas) as part of self-learning
- Studying supervised learning concepts and data preprocessing techniques

ADDITIONAL INFORMATION

- **Career Goals:** Aspiring software engineer focused on frontend development and AI/ML, seeking to contribute to innovative product-based engineering teams
- **Approach:** Self-motivated with strong commitment to continuous learning through daily coding practice, certifications, and hands-on projects
- **Interests:** AI, Machine Learning, Frontend Development, Cloud Computing, Cybersecurity, Fitness
